

CONFLICT MINERALS STATEMENT

On July 21, 2010, The Dodd-Frank Act was signed into law. The Dodd-Frank Act and related 2012 U.S. Securities and Exchange Commission rules require certain companies to disclose whether the products they manufacture or contract to manufacture contain Conflict Minerals necessary for the production or the functionality of the products that are sourced from mines in the Democratic Republic of the Congo or adjoining countries. Conflict Minerals are tantalum, tin, tungsten and gold.

Penn Cable Assembly is a contract manufacturer of wire leads, wire harnesses, cable assemblies, and is a supplier providing value added services by modifying existing manufactured products. Our customers supply and control the bill of materials (BOM). As a reseller of products manufactured by other companies, Penn Cable does not directly purchase any raw Conflict Minerals from any source and is many levels removed from the mines, smelters, and refiners that produce the metals used in the products manufactured or distributed by Penn Cable suppliers.

Penn Cable is a closely held company that does not file reports with the SEC, and are therefore not bound by the Conflict Minerals provision of the Dodd-Frank Act. However, we recognize that many of our customers are. To support these customers, Penn Cable has the expectation of its suppliers; Suppliers should not include in any products sold to Penn Cable any Conflict Minerals that are not DRC Conflict Free.

Penn Cable Assembly fully understands the importance of this issue to its customers and is a social responsible organization. We will undertake reasonable due diligence within our supply chain to sourcing products and materials from non-conflict sources.
